To help you work within your budgets and planning, we have categorised each of the products:

BRONZE = Products that would be considered entry level

SILVER = Products that would be considered mid range

GOLD = Products that would be considered high range

These symbols should be used **as a guide only** as it is almost impossible to compare different products based on price alone. We have tried to take into account many different elements of the product including features, quality, cost of installation, and price. As our range across all brands is so large we have not been able to include every product, however we have included those specified most often. Please call Caroma Dorf on 07 3131 5999 or 1800 227 662 if you would like specific pricing or technical details. Final pricing is heavily dependent on quantities.
